

# Climate ambition

Why

**Pass on to following generations in even better state**

## Legislation

### Paris Climate Agreement

- 2050 max. 1,5 °C warming

### EU Green Deal

- 55% CO<sub>2</sub> reduction (compared to reference year 1990)
- 2050 climate neutral

### Climate policy NL

- 2030 60% CO<sub>2</sub> reduction

**Local and social involvement**

Ambitions

## Objectives

### Scope 1

CO<sub>2</sub> emissions

**2030**

CO<sub>2</sub> reduction

**-46%**

**2050**

Net zero in complete chain

**-100%**

### Scope 2

CO<sub>2</sub> emissions

**-97%**

**-100%**

### Scope 3

CO<sub>2</sub> emissions

**-33% agriculture \*  
-28% other**

**-72% agriculture \*  
-90% other**

\* For certain sectors, the Science Based Targets initiative sets different objectives for agricultural activities that apply to our business.

The above objectives are based on the reduction of CO<sub>2</sub> emissions compared to 2019.

## Current emissions

	kt CO <sub>2</sub> e 2023
<b>Scope 1</b>	74
<b>Scope 2 (market-based)</b>	0
<b>Scope 3 (total)</b>	642
● Scope 3 (agriculture)	313
● Scope 3 (other)	329

The calculation of our scope 3 emissions is in line with the GHG Protocol and with respect to this year, we only report on 2023. The 'Reporting manual non-financial information, March 2024' states which criteria we applied and which assumptions were made.
